For protecting and maintenance care of polished concrete. Improve and protect surface day by day.

00604LT5	Stone Soap	5 lt.	
00604BOX	Stone Soap	3 x 5 lt.	

Beton Filler

Beton Filler is a product developed for grouting and filling up small holes and superficial cracks of the concrete floor. Fast to use because it is applied with grinding machine fitted with diamond disc CR2. Mixed with the dust created during the grinding operation it will get the same colour of the surface. It is compatible with Beton Colour Dye.

00615	Beton Filler	1 lt.	concentrate: dilute max 10%

Beton Grout & Crack Repair

Beton Grout is Bimack' system developed to fix very damaged concrete floors, to close large holes and deep cracks. The system is composed by three products: BETON GROUT CATALYZER, BETON GROUT RESIN and micro spheres BETON GROUT GLASS BUBBLES. The main features of BETON GROUT SYSTEM are:

- a) The micro spheres keep the product soft and malleable, and allow to fill perfectly the area to repair.
- b) The resin is "expansive" permitting the subsequent grinding and polishing.

00635	Beton Grout Catalyzer	1 Kg.	
00636	Beton Grout Resin	1 Kg.
