

SW2

SW 2: the multifunction steam cleaner that combines steam and vacuum suction power.

Cleaning up solids and liquids easily, adjusting the motor power electronically to three possible levels directly from the handle, purifying the air thanks to the filtration system fitted with the patented RAIN SYSTEM water filter. All this is possible thanks to the SW 2 multifunction steam cleaner by TPA Impex, which combines steam at 4.5 bars with a vacuum suction function. To meet all the user's needs, TPA Impex includes a large number of accessories in the supply of this steam cleaner, which are suitable to clean the grout lines between tiles, range hoods, and glass.

The sanitizing power of steam can easily remove mites, germs, bacteria, and inactivate viruses.

SW2 is fitted with a handle for steam control (with 3 adjustment levels), a continuous refill system, a boiler made of AISI 304 stainless steel, a safety cap, and a probe for removing limescale.

Patented Easy Clean System

The Easy Clean system allows a complete and effective cleaning of the filter system.

The tank was designed to be removed and washed under running water.

A practical solution to clean your steam cleaner in a few simple steps.

Removable electronic probe for monitoring limescale

This patented probe is an excellent device for a steam cleaner, since it allows the water level to be constantly monitored in boilers that have a continuous refill system.

It also helps monitor the limescale level inside the system: you only need to unscrew it to easily remove any limescale present, thus avoiding the service costs.

Patented RAIN SYSTEM water filter with Venturi technology

Our steam cleaners that combine steam and suction sanitization use Rain System technology. Pollen, mites, molds, spores and microparticles are sucked into the special patented water filter where two removable and washable side nozzles constantly nebulize high-pressure water, blocking all types of incoming contaminants and giving the environment a perfectly purified-outlet air stream

Washing-hot water extraction function

With the washing-hot water extraction function steam is generated together with a water solution to remove stubborn dirt effectively.

According to the contents of the bottle, it is possible to obtain either a mixture of steam with a water-detergent solution, or a mixture of steam and water, used with the hot water function.

Continuous refill system

SW2 is equipped with a continuous refill system. You will be able to sanitize without ever having to stop.

Handle for steam and suction control (with 3 adjustment levels)

Easy to use, with digital steam and suction controls right on the handle.

SW2

POWER SUPPLY	230 V
HEATING UP TIME, BEFORE USE	3 MINUTES
BOILER REFILL SYSTEM	AUTOMATIC REFILL
OPERATING PRESSURE	4,5 BARS (450 kPa)
MAXIMUM TEMPERATURE	155 ° C
BOILER CAPACITY	1 L
BOILER MATERIAL	AISI 304
BOILER POWER	2.200 W
VACUUM POWER	1.100 W
IRON POWER	850 W
STEAM PRODUCTION	50 gr. / min
MAXIMUM POWER ABSORBED	2.200 W
STEAM FLOW ADJUSTMENT	YES, MANUAL
VACUUM POWER ADJUSTMENT	YES, WITH 3 LEVELS
MAXIMUM DEPRESSION	2.250 mm H ₂ O
AIR FLOW	80 m ³ /h
WATER TANK CAPACITY	1.3 L
DETERGENT TANK CAPACITY	2 L
RECOVERY TANK CAPACITY	1.7 L
FILTRATION SYSTEM	WATER VENTURI
BRUSH HOUSING	YES
WEIGHT	10,5 KG
RANGE OF ACTION	7 m
DIMENSIONS L x W x H	452/325/360

TPA IMPEX S.p.A. is an **Italian company** founded in 1987 by Luigi Amoretti that is based in **Romano d'Ezzelino** in the province of Vicenza, in north-eastern Italy. The company has **more than thirty years of experience** in the design and manufacture of sanitation systems for domestic and industrial use.

Constant investments in Research & Development demonstrate this company's unwavering commitment to find high-tech solutions which respect the environment and all the applicable safety standards.

Furthermore, the particular attention dedicated to the manufacturing processes (100% Made in Italy) together with the careful selection of materials and the choice of excellent partners, represent the strategic advantages that place this company at the forefront in the defense and promotion of **Italian know-how**.
