

UltraShine & UltraLux

New and revolutionary diamond discs to restore the gloss on marble floors and terrazzo. Used regularly, they maintain floors always bright as just polished. Easy to use. Use them as a normal "floor pad" disk with mono brush machines or auto-scrubbers. They remove scratches, even deep, clean and polish.

ULTRASHINE PLUS, with semi-rigid support, is recommended with the use of "mono brush machines" to re-polish perfectly and in a short time also very old and worn out floors, getting results comparable to those obtained with the professional Floor Care Machines. They leave a mirror and glide polished surface without "the orange peel effect" which generally leave the competitors diamond abrasive discs on soft support. They remove deep scratches and restore also acid, wine, coca cola or other products stained - floors.

ULTRASHINE SOFT, with soft support like "floor pads" is designed for more ordinary use, for glossy recovery and maintenance in large areas with auto-scrubber. Used with normal mono brushes, they can polish also old and worn floors, ensuring an optimal result, not comparable to ULTRASHINE PLUS but higher than similar products which are on the market because they contain more "diamond". ULTRASHINE SOFT can be used WET or DRY SYSTEM!

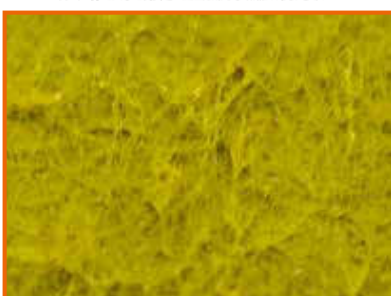

ULTRASHINE PLUS and ULTRASHINE SOFT, are available in several grains 00, 0, 1, 2 and 3. Generally used grains are 1, 2 and 3 followed by ULTRALUX. If deep or very deep scratches need to be removed it is suggested to start from 0 or 00.

ULTRALUX is a special sponge disc, that is able to wash and polish with only one step. Thanks to its special composition. UltraLux is the ideal solution for standard maintenance of all type of surfaces since it provides great results and keeps floors shining forever.

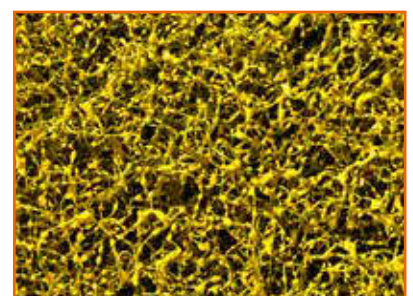

Ultrashine Plus

UltraLux

Ultrashine Soft

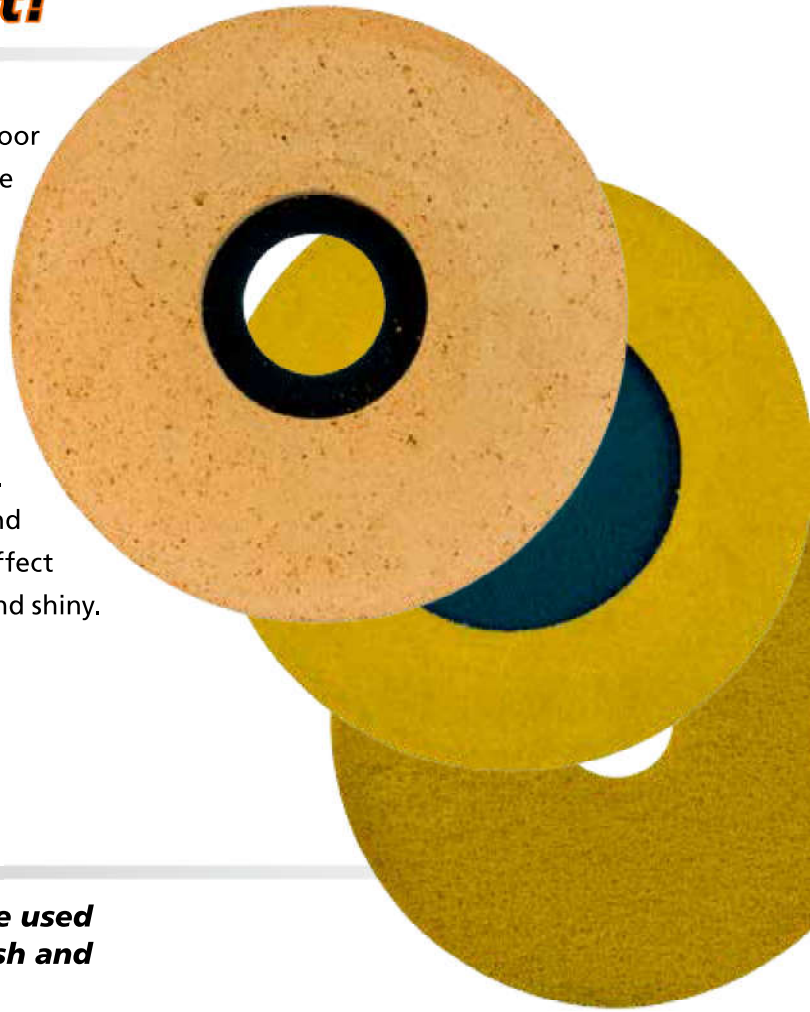

Efficient, Fast, Bright!

"UltraShine & UltraLux" are easy to use!

They are available in the same standard sizes of the Floor Discs normally sold all over the world. They can be applied on any type of single-brush and auto-scrubber on the market. Using "UltraShine & UltraLux" regularly, instead of the traditional Floor Pads, it allows to restore and maintain the pavement shiny forever without changing your normal maintenance routine. The combination of UltraShine 1, UltraShine 2 and UltraShine 3 will allow you to remove scratches. UltraLux, thanks to its magic formula, cleans and polishes marble, terrazzo ecc...giving it a mirror effect quickly! Regularly used, your floor will remain clean and shiny.

Ultrashine & UltraLux can be used with any type of mono-brush and auto-scrubber

Diamond and Water, respecting the environment

Just add a little water!

The use of UltraLux and UltraShine discs requires no chemical or wax. Cleaning and polishing are carried out in full respect of the environment. The use of just water reduces the environmental impact and eliminates the costs due to the purchase of additional chemicals.

Benefits:

- It cuts costs.
- It improves your performance.
- It increases customer satisfaction.
- Floor is always clean and shining.
- Environmental sustainable cleaning.
- It requires only water.
- It reduces bacteria on floors.

Where others cannot reach

The perfect combination between Bimack machines and UltraShine discs allows you to operate where others can't. For example:

With **UltraShine** and **Babol** you can conveniently polish staircases and landings.

With **UltraShine** and **Vertikal BK** you can rapidly polish walls, counters and top.

With **UltraShine** and **MiniElle** you can polish narrow spaces.
